

SO YOU WANT TO PLAN YOUR GARAGE STORAGE?

The garage is not just a place to keep the car, it's where you create, build and repair. Acting as a multi-functional storage space, the garage serves many different purposes and needs. However, this means it can quickly fill with tools, yard equipment, pool accessories, sports gear, bikes and recycling bins.

Installing versatile storage systems designed to fit your family's needs and lifestyle will help you keep your garage functional. This NewAge Product Garage Storage Planning Guide will help you organize your space in its place.

**PRO TIP: GARAGE STORAGE PLAN CHECKLIST****Purge your Garage:**

- Decide what to keep.
- Categorize these items.
- Get rid of or sell everything else.

Clean and Inspect:

- Vacuum or sweep floors.
- Clean floor oil stains with detergent. Rinse and let dry.
- Hose down and mop floors, let dry.
- Declutter and properly organize the items you have chosen to keep.

Make a Storage Plan:

- Draw a rough floor plan.
- Mark where you plan to put items from each category.
- Keep floor plan for future use and to quickly locate valuables.

Get Everything Possible Off the Ground:

- Use vertical space (Consider using Base Cabinets, Drawers, Locker Cabinets).
- Use the walls (Consider Slatwall storage, Wall Cabinet).
- Store the items that you use least frequently in the highest place.

Finish the Job:

- Take hazardous waste to the proper disposal or recycling facility.
- Make a run to a local charity or plan a yard sale for disposal.

Make an Entrance:

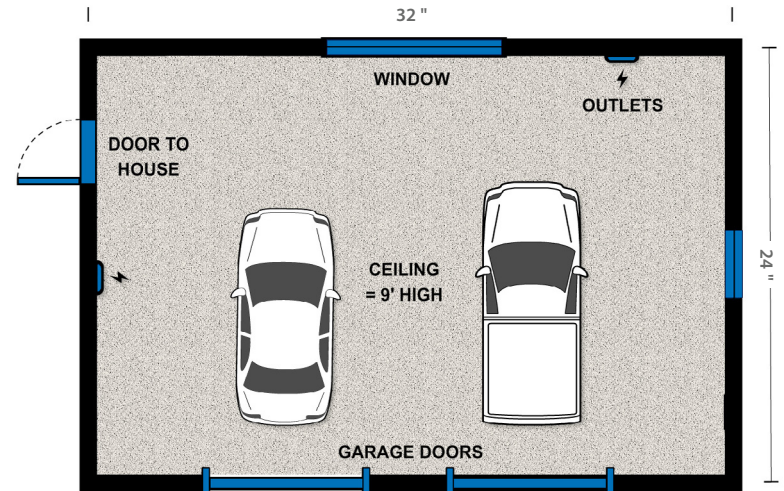

- Add a doormat.
- Provide shelving for shoes.
- Hang up the closet rod in the Locker for coats and other items.

Keep up the Great Work:

- Label all new products you add to storage and clearly mark it on plan.
- Wipe up new oil stains as they appear.
- Keep a box in the garage to collect special recycling/waste.
- Set a date once or twice a year for a thorough clean.

STEP 1: PLAN FOR THE FUTURE

It's time to get personal... What is YOUR garage used for? Write down everything you use or store in your garage. Keep in mind any items you might need to store in the future, such as a new ATV purchase, that air compressor your neighbor borrowed or seasonal items that are currently in use.

**EXPERT ADVICE****Measure Your Space**

It is important to get the exact dimensions of your garage. Measure and record:

- Front, back and side walls.
- Size and location of windows and doors, including doorstep.
- Locations of stairs, outlets and switches.
- Floor space occupied by vehicles.

STEP 2: DESIGNATE YOUR ZONES

Designating specific areas to store similar items will help you stay organized. Whether you're into cars, woodworking, kayaking, bikes, motorcycles, model planes or ATVs, having a dedicated space will help you enjoy your favourite pastimes. Group your needs and determine which area of the garage they will go. Here are some suggestions:

Gardening Zone

Mudroom Zone

Cleaning Zone

Automotive Zone

Sports Equipment Zone

Seasonal Items Zone

EXPERT ADVICE

Think About It First

Don't get stuck when organizing the garage - instead, design with family organization in mind. A simple redesign of your garage can make all the difference, specifically when you assign organizing "zones" to each section of the garage.

PRO TIP: CABINET SERIES CHECKLIST PLAN

Use this checklist to create a customizable cabinet set that is perfect for your needs:

PERFORMANCE SERIES:

Multi Use Locker

Extra-Wide Locker

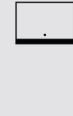

2-Door Base

4-Drawer Tool Cabinet

Rolling Tool Cabinet

Wall Cabinet

Corner Wall Cabinet

PERFORMANCE PLUS SERIES:

Multi Use Locker

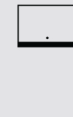

Mobile Locker

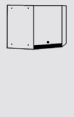

2-Door Base

5-Drawer Tool Cabinet

Wall Cabinet

Corner Wall Cabinet

PRO SERIES:

Multi Use Locker

Sports Locker

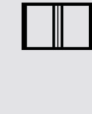

2-Door Base

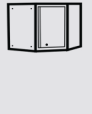

5-Drawer Tool Cabinet

Multifunction Cabinet

Wall Cabinet

Corner Wall Cabinet

BOLD SERIES:

Multi Use Locker

Extra-Wide Locker

2-Door Base

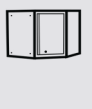

4-Drawer Tool Cabinet

Rolling Tool Cabinet

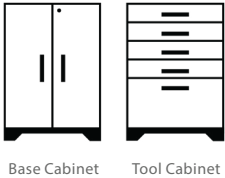

Wall Cabinet

Corner Wall Cabinet

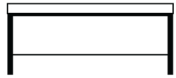

CREATING ZONES IN YOUR GARAGE

Storage Solution

Base Cabinet

Tool Cabinet

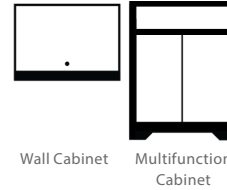

Workbench

Gardening Zone

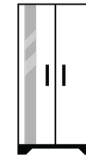

A gardening zone is a must-have location for anyone with a green thumb. **Base Cabinets** are the perfect solution for storing your soil and watering can, while our **Workbenches** give you plenty of space for seed starting and potting. Add a **Tool Cabinet** which will also give you a place to store your gardening gloves, trowels, pruners and other garden tools.

Storage Solution

Wall Cabinet

Multifunction Cabinet

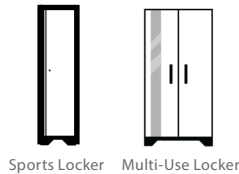

Multi-Use Locker

Cleaning Zone

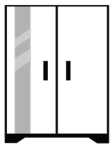

This washing and cleaning area, ideally located near the garage sink, can keep outdoor messes out of the house. **Multi-Use Locker Cabinets** provide the ultimate versatile storage solution and feature adjustable shelves for storing larger items like garden hoses, watering cans, buckets or a pressure washer. Add a **Multifunction Cabinet** for small and medium sized items such as sponges, fluids, brushes and other cleaning tools.

Storage Solution

Sports Locker

Multi-Use Locker

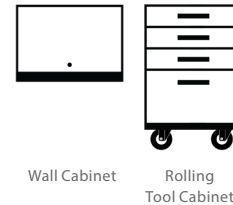

Extra-Wide Locker

Mudroom Zone

One of the best ways to organize a mudroom is to provide a dedicated space for each person. Our **15"** wide **Sports Lockers** include adjustable shelves and a closet rod, making it easy to store everything from gloves, hats and scarves, to running shoes and sports equipment. The larger **30"** or **36"** wide **Multi-Use Lockers** are another great item for the mudroom, because they offer adjustable shelves and a closet rod for much more storage space.

Storage Solution

Wall Cabinet

Rolling Tool Cabinet

VersaRac

Automotive Zone

Make car repairs, detailing and maintenance a breeze with a dedicated automotive zone. Consider adding a **Wall Cabinet** for a place to put your car cleaning kit and install an overhead **VersaRac** to make storing tires easy. To have all your tools easily accessible, add a **Rolling Tool Cabinet**, which will also provide you with storage for your wrenches, ratchets, sockets and various sizes of nuts and bolts.

STEP 3: PLAN YOUR STORAGE

Add Some Storage

Pick your perfect storage components to ensure that you have a place for everything.

Cabinets

Two-Door Base

This cabinet is great for medium sized items, such as: gardening tools, sports gear, kid's items or larger tools. Secure casters to any Base or Tool Drawer to make them fully mobile.

Tool Drawer

This drawer is ideal for small tools and hardware, such as nails, screws, hooks, hammers and wrenches. The heavy-duty full extension drawers slide smoothly on soft-close ball bearing slides.

Multifunction Cabinet

Along with tool and recycling or garbage bin drawers, this cabinet also includes a small parts drawer, complete with 24 storage containers, perfect for small parts and tools.

** Pro Series only*

EXPERT ADVICE

Cable Management for Cabinets

NewAge Worktops are designed with 2-inches of overhang that can be positioned off the front or back of the cabinets. Having the overhang off the back of the cabinets allows you to easily run power through the cable management system.

Lockers

Multi-Use Locker

Ideal for your bigger and bulkier items, this Locker Cabinet features adjustable shelving in 1" increments and an adjustable closet rod with multi-peg hooks.

Extra-Wide Locker

Get more space than ever before for storing big and bulky items, such as storage bins and tools.

** Bold and Performance Series only*

Mobile Locker

Comes complete with Casters, allowing you to move the locker as desired.

** Performance Plus Series only*

Wall Cabinets

Wall Cabinet

A sleek and secure solution for getting your gear up and off the ground.

Corner Wall Cabinet

Maximizes the storage capacity of your setup and easily mounts to a 90-degree wall.

STEP 4: PLAN YOUR CABINET LAYOUT

To create a floor plan of your garage, start by measuring the dimensions of the walls and the positions of any fixed items like windows, doors and cars. Depending on which series of cabinets you choose, the dimensions of your cabinets will vary. Check the available storage depth, height, width, as well as where installation will occur and record it on your floor plan.

Depth:

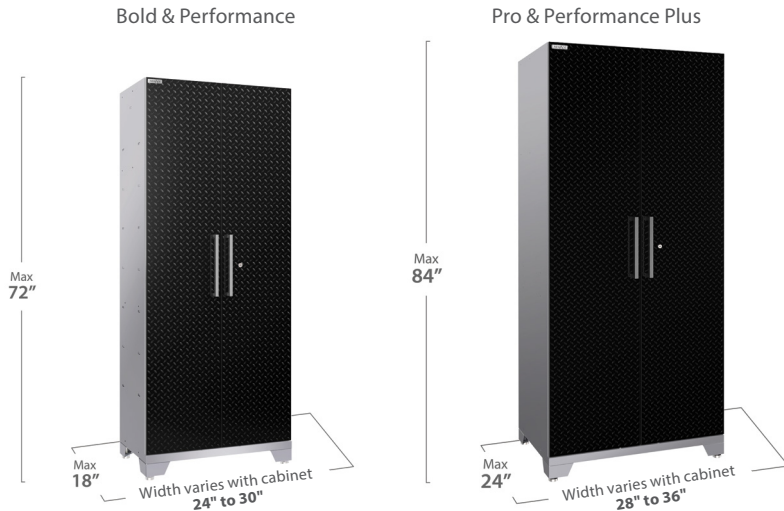

Check depth noting that doors on cabinets, cars and entrances, all swing open. Pro and Performance Plus series are a **24"** deep system, Bold and Performance series are a **18"** deep system.

Height:

Check height noting that the tallest cabinet in each series is the locker cabinet. Pro and Performance Plus series lockers require **more than 84-inches** of clearance, whereas the Bold and Performance series lockers, require **more than 72-inches** of clearance.

Width:

Mark the widths of your cabinets on your garage floor plan, to ensure your cabinet selection will fit.

Determine Installation Method

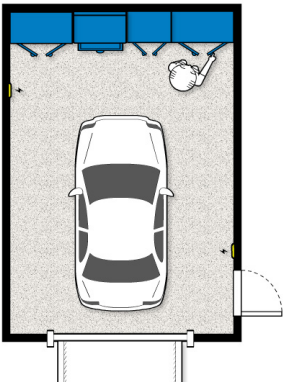

Cabinets can be installed on leveling legs, directly on the wall, hung on slatwall (*slatwall brackets sold separately*), bolted together to create mobile workstations or even stacked on top of each other to fit your space.

 Common Garage Design Layouts

Here are some ideas of how to lay out your garage storage configurations:

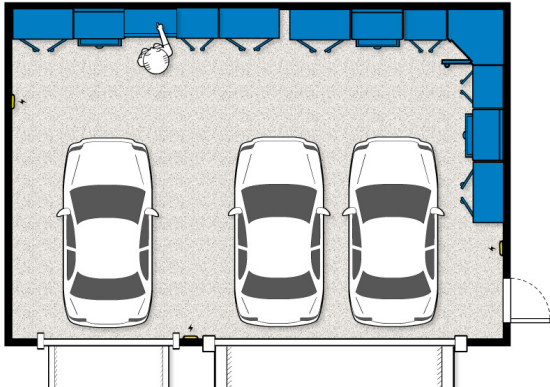

1-Car Garage

2-Car Garage

3-Car Garage

Suggested Configurations

6-Piece Cabinet Set

8-Piece Cabinet Set

12-Piece Cabinet Set

7-Piece Cabinet Set

10-Piece Cabinet Set

14-Piece Cabinet Set

STEP 5: CHOOSE THE SERIES THAT WORKS FOR YOU

[Compare](#) the NewAge Products **Pro**, **Bold**, **Performance** and **Performance Plus** series of Garage Cabinets to decide which one best fits your lifestyle.

Here are some helpful tips when planning your garage layout and cabinet locations:

- Each series of garage cabinets are a **customizable modular system**, allowing you to reposition cabinets in many different layouts (installed on the floor, hung on the wall or mounted to slatwall).
- **Worktops** can be secured to the side of a locker to create an open workspace for pull-up stools and chairs.
